Projects

Cabin Fever

3 Week Duration

2 Back-End, 2 Front-End Developers

Cabin Fever is an app that seeks to make finding that perfect cabin easier. We provide a place where cabin owners, regardless of which management company they use, can list their cabin for rent and have their guests share their experiences.

Votr

3 Day Duration

2 Back-End, 2 Front-End Developers

Users can view live political polling feed of votes going on locally, or nationally.
